

Alex Rivera

alex.rivera@example.com | 206-555-0142 | Seattle, WA

Web Developer with professional experience specializing in PHP and Java environments. Proven track record of maintaining legacy systems, building internal business tools, and managing SQL databases. Seeking to transition into high-scale product engineering.

Work Experience

Web Developer Quarryfox Creative	Seattle, WA Jul 2025 – Present
---	-----------------------------------

- Developed and maintained client websites using PHP, HTML5, and jQuery, ensuring cross-browser compatibility.
- Managed content updates and custom plugin development for WordPress-based marketing sites.
- Optimized site assets and image compression to improve Google Lighthouse scores for local business clients.
- Coordinated with design teams to translate Figma wireframes into static CSS layouts.

Junior IT Specialist Thornbell Community Health	Renton, WA Oct 2024 – Jun 2025
--	-----------------------------------

- Maintained internal patient record databases using Java (Spring Boot) and MySQL, focusing on data entry stability.
- Performed manual QA testing for internal administrative portals, documenting bugs in Excel for the senior IT team.
- Assisted in the migration of on-premise file servers to Dropbox Business for decentralized clinic access.
- Provided technical support for internal staff regarding portal access and basic software troubleshooting.

Projects

Local Business Directory PHP, MySQL, Bootstrap	Jan 2026 – Present
---	--------------------

- Built a searchable directory for local contractors using a LAMP stack; implemented basic CRUD operations for user listings.
- Utilized Bootstrap for a mobile-friendly frontend and stored user data in a structured MySQL database.

Employee Timesheet Tool Java, Swing	Aug 2025 – Nov 2025
--	---------------------

- Developed a desktop-based GUI application for employees to log hours and export data to CSV format.
- Implemented basic password protection and file-based data persistence.

Weather Info Script Python, OpenWeatherMap API	Jun 2024 – Aug 2024
---	---------------------

- Created a Python script that fetches weather data and emails a daily summary to a list of subscribers using SMTP.
- Managed script execution via Cron jobs on a local Linux server.
