

Casey Morgan

casey.morgan@example.com | 206-555-0122 | LinkedIn | GitHub

Software Engineer with 1.6 years of experience building full-stack web applications and microservices. Proficient in TypeScript, React, and Node.js with a focus on cloud-native deployments (Azure/GCP) and relational database design. Experienced in Agile environments and shipping features through containerized CI/CD pipelines.

Work Experience

Software Engineer

Seattle, WA

SaaS Peak

Jul 2025 – Feb 2026

- Developed and scaled user-facing dashboards using React and TypeScript, optimizing state management with Redux and improving UI responsiveness.
- Engineered backend microservices using Node.js on Azure Functions, facilitating real-time data synchronization for 1,000+ daily active users.
- Designed and implemented RESTful APIs to handle complex customer data workflows, reducing endpoint latency by 20% through optimized PostgreSQL queries.
- Collaborated in an Agile team to ship bi-weekly features, utilizing Docker for local development consistency.

Junior Software Developer

Remote

Vexley Learning

Oct 2024 – Jun 2025

- Maintained and enhanced a full-stack educational platform using Node.js and Express, supporting high-traffic student enrollment periods.
- Implemented secure JWT-based authentication and role-based access control (RBAC) to ensure data privacy for user profiles.
- Automated internal reporting tasks by writing scripts in Python, increasing data processing efficiency by 35%.
- Utilized Jenkins for CI/CD automation and maintained 80% code coverage using the Mocha/Chai testing framework.

Projects

Serverless Inventory Manager

GCP, Node.js, MongoDB

Jan 2026 – Present

- Built a serverless inventory tracking system on Google Cloud Platform using Cloud Run and Cloud Pub/Sub for event-driven updates.
- Integrated a MongoDB backend to store dynamic product schemas, enabling flexible filtering for diverse retail items.

DevOps Automation Suite

Docker, Jenkins, Bash

May 2025 – Aug 2025

- Created a centralized CI/CD pipeline in Jenkins that automates linting, unit testing, and Docker image deployment to a private registry.
- Developed custom Bash scripts to monitor container health and automate rollbacks in staging environments.

Real-time Collaborative Editor

TypeScript, React, Socket.io

Jun 2024 – Sept 2024

- Architected a web-based document editor using React and Socket.io to support concurrent editing across multiple sessions.
- Utilized TypeScript for robust type-safety and implemented a conflict resolution algorithm to handle simultaneous data synchronization.

Technical Skills

Programming: TypeScript, JavaScript (ES6+), Python, SQL, HTML/CSS

Frameworks & Libraries: React, Node.js, Express, Redux, Mocha, Chai, Socket.io

Cloud & DevOps: Azure Functions, Google Cloud Platform (GCP), Docker, Jenkins, Firebase

Databases: PostgreSQL, MongoDB, Redis, MySQL

Deployment & Optimization: CI/CD (Jenkins), REST APIs, JWT/OAuth2, Git, Jira

Education

University of Washington

Bachelor of Science in Computer Science

Aug 2020 – May 2024

Sample resume. All people, companies, and contact details are fictitious.
